ACADEMIC PROJECTS

- **Whatsapp Chat Analyser**
  - In olden days' there is no analysis for whatsapp chat. If someone wants to analyze there is no CSV file to analyze. WhatsApp Application provide export txt file which is in raw format. It is very complicated for analysis. So we have to forget that system and switch over to the WhatsApp Chat Analyzer
- **Wireless Health Monitoring System**
  - The Wireless Health Monitoring System integrates NodeMCU, ThingSpeak IoT platform, and GSM technology to create a revolutionary solution for remote patient monitoring and real-time communication between patients and doctors. This project aims to continuously monitor vital health parameters, such as heart rate, body temperature, and blood pressure, and securely transmit the data to healthcare professionals.

EXPERIENCES
